

# Country social factor clustering

Ivan Shamoon

Goal: Can a machine learning clustering algorithm accurately characterize countries into their respective regions based on a variety of factors.

## Initial observations

Selected Value by Continent and Continent

Selected Value by Continent and country

Name: Homosexuality Tolerance

- Average Schooling
- Crime Index
- Female Life Expectancy
- Food Scarcity
- Homosexuality Tolerance
- Male Life Expectancy
- Obesity
- Political Stability
- Water Score

# Clustering Analysis

Clustering Analysis allows us to gather interesting insights about their characterization. Each country falls under one cluster and by surveying its category we can view its behavior in the scope of its social factors.

crimeIndex by clusters and Continent

happiness2021 by clusters and Continent

homosexuality\_score by clusters and Continent

food\_insecurity\_2017 by clusters and Continent

political\_stability\_2020 by clusters and Continent

obesity\_2016 by clusters and Continent

Continent	0	1	2	3	4	5	Total

## Insights about the Clusters

### Cluster 0:

- \* Lacks obesity
- \* Politically stable
- \* Good protein supply
- \* High avg schooling
- \* Strong LGBT tolerant
- \* High life span in both sexes compared
- \* High emissions

### Cluster 3:

- \* Very malnourished
- \* Not Tolerant of LGBT
- \* Low emissions
- \* No representation in Europe
- \* No representation in South America
- \* No representation in Africa
- \* Middle ground political stability

### Cluster 1:

- \* Somewhat obese
- \* Politically unstable
- \* Low protein supply
- \* Low emissions
- \* Lacks any representation in Europe
- \* Moderately malnourished

### Cluster 4:

- \* Not representation in Oceania
- \* Low emissions
- \* High obesity
- \* Politically stable
- \* High protein supply
- \* Malnourished
- \* Tolerant of LGBT
- \* High water score

### Cluster 2:

- \* Not Oceania
- \* Very high emissions
- \* Not LGBT tolerant
- \* High protein supply
- \* A little obese
- \* Malnourished

### Cluster 5:

- \* Not Europe or South America
- \* Somewhat malnourished
- \* Not LGBT tolerant
- \* Low water score
- \* Low emissions
- \* Low average schooling
- \* Low protein supply
